Department of Natural Resources
Post Office Box 1368
Jefferson City, Missouri 65102

ATTN: Art Groner

Dear Dr. Bedan:

As a follow up to your meeting with members of my staff on September 19, I am requesting your assistance and concurrence with interim status deletions which do not require Part 124 action, for the sites listed below. Each claims not to have used interim status and our records appear to substantiate this contention.

Before we take final action, we would appreciate it if you would check your records, especially any inspection reports which you may have, and base your concurrence or non-concurrence on this data. Where a recent inspection has not been made, we would like your assistance in scheduling one for purposes of this decision.

When we receive your concurrence, we can move quickly with these deletions. Betti Harris will be the contact person for this project.

1. Jefferson - MOD006301501

- If you have a recent inspection report, this file can be moved immediately, since all our records indicate their operation as a generator only.

2. Parker Chemical - MOD980631345

- This company has tried several times to delete their interim status, but has had numerous ownership changes. The documentation (new material attached) appears to be in order - but we would like a State inspection. If you have a recent one and concur with their request, please send us a copy. Otherwise, we would appreciate it if you could inspect before we finalize this one.

3. McQuay - Norris - MOT300010345

- Our file gives no indication that they used their interim status at this site. We would appreciate your file review and determination as to whether an inspection is advisable. Correspondence is attached.

Thank you for your assistance with this project.

Sincerely yours,

Robert L. Morby
Chief, Waste Management Branch
Air and Waste Management Division
